PROFESSIONAL EXPERIENCE

PHOTON INTERACTIVE

Lead – Talent Acquisition | May 2024 – Present

Company Size: 7,500+ | **Reporting To:** Director – Talent Acquisition

Key Responsibilities

- Lead recruitment delivery for strategic technology, cyber security, architecture, and leadership hiring initiatives across India.
- Manage hiring portfolios with 110+ concurrent requirements across multiple business units and strategic customer accounts.
- Support Societe Generale hiring programs with 100+ active requirements across technology and BFSI domains.
- Partner with Delivery Heads, Practice Leaders, Engineering Managers, Business Unit Leaders, and Sales stakeholders to align workforce planning with business priorities.
- Drive recruitment governance through KPI reviews, demand prioritization, pipeline management, hiring analytics, and leadership reporting.
- Developed recruitment dashboards using Jira and Advanced Excel (XLOOKUP, Pivot Tables), improving visibility into hiring performance and delivery effectiveness.
- Established focused hiring WAR Rooms for critical business programs, accelerating closures and reducing hiring turnaround time.
- Mentor recruiters on stakeholder management, sourcing effectiveness, talent intelligence, and recruitment best practices.
- Monitor recruitment metrics including Time-to-Hire, Cost-per-Hire, Offer Conversion, Demand Fulfillment, and Hiring Velocity.

AI-Driven Recruitment Innovation

- Leveraged AI tools to generate role-specific technical interview frameworks and competency-based interview questions for niche technologies when technical panels were unavailable.
- Conducted AI-assisted technical screening and candidate assessments for hard-to-fill technology positions.
- Utilized AI to analyze interview conversations and generate structured evaluation scorecards.
- Applied AI-driven talent intelligence and market mapping techniques to identify target talent pools and competitor talent.
- Enhanced recruiter productivity through AI-enabled sourcing methodologies and Boolean optimization.
- Reduced dependency on technical panels during initial screening stages through AI-generated competency assessments.
